

30 April 2012

Modern Water plc
("Modern Water" or "the Group")

MODERN WATER OPENS NEW OFFICES IN THE USA

Modern Water opened its first office in the United States on 30 April 2012. The office is located in New Castle in Delaware and comes following the acquisition of the water quality division of Strategic Diagnostics Inc. (SDIX) in December 2011. The new office is a fully standalone facility, which includes laboratories and warehousing facilities and is the base for Modern Water's operations in the Americas.

Alan McQuillin, Vice President of Operations and Technology for Modern Water Inc. commented, "The last few months since the acquisition have been an exciting time and we have worked very hard to find office space with laboratories, sign a lease and fit out the offices. We are now well placed to increase sales of Modern Water's monitoring products throughout the Americas."
