

MODERNWATER

9 July 2012

Modern Water plc
("Modern Water" or "the Group")

MODERN WATER EXHIBITS AT SINGAPORE INTERNATIONAL WATER WEEK

Modern Water plc (AIM:MWG) exhibited for the first time at the annual Singapore International Water Week (SIWW). This world-leading conference was held between 2 - 5 July and proved to be an ideal platform for Modern Water to promote and launch its innovative range of water monitoring and treatment products.

Modern Water's water monitoring products detect toxicity, trace metals and specific environmental pollutants such as VOCs, THMs and ammonia in drinking water; wastewater; seawater; fresh water and soils. We also showcased the new Aguacure EC electrocoagulation process for chemical-free wastewater treatment at the event.

New sales leads from as far afield as Brazil, Australia and China were also captured at the exhibition and are expected to lead to field trials and new sales.
