Modern Water plc
("Modern Water" or "the Group")

MODERN WATER'S MONITORING DIVISION SIGNS NEW LICENCES

Modern Water plc (AIM:MWG) is pleased to announce that in May 2012 it has agreed terms to licence new products from Multisensor Systems Limited and Chelsea Technologies Group Ltd.

The new products complement Modern Water's existing product portfolio and provides various online and portable monitoring systems for clean and waste water including monitoring for trihalomethanes, VOCs, hydrocarbons, chlorophyll, algae and BOD.

Neil Townend, General Manager of Modern Water's Monitoring division commented, "We are very happy to have signed the new licences and expand our product range. A key feature of the new products is the very low maintenance requirements due to calibration stability, no reagents required and virtually no moving parts."

Notes to Editors:

Modern Water (www.modernwater.com) owns, installs and operates world-leading membrane technologies and develops and supplies advanced systems for water monitoring. Its shares trade on the Alternative Investment Market of the London Stock Exchange.

Modern Water's patented forward osmosis technology has been proven to significantly reduce costs, lower energy consumption and lessen environmental impact in a variety of industries. With a sales presence in over 60 countries, the Group's Monitoring division includes the world's best performing real-time continuous toxicity monitor and trace metal analysers for monitoring the quality of drinking water.
