MODERN WATER'S AL KHALUF FORWARD OSMOSIS PLANT IS FEATURED ON BBC

Modern Water plc's (AIM:MWG) cutting edge forward osmosis desalination technology has recently been featured on the BBC World News.

The program shows how Modern Water has used its innovative forward osmosis technology at the Al Khaluf plant in Oman to provide clean drinking water. The local community also recount how the supply of fresh water has had a huge impact on their daily lives.

This project has also proven to reduce energy consumption by up to 50% which has a significant effect on operating costs.
