Modern Water plc
("Modern Water" or "the Group")

MODERN WATER PART OF KEY INDUSTRY PRODUCT CATALOGUE

Modern Water plc (AIM:MWG), the owner of leading water technologies for the production of fresh water and monitoring of water quality, today sees its toxicity products included in the launch of the annual USABluebook which is recognised as the number one source of products and technical support for professional water and wastewater operators across North America.

The company USABluebook is a one-stop shop for all water and wastewater products and its catalogue is sent to over 100,000 customers across the United States. It is predicted that entry into the catalogue will strengthen sales of Modern Water's Microtox® M500 and Deltatox® II toxicity monitors and should increase brand awareness of Modern Water's monitoring products in the Americas.

Neil Townend, Managing Director for Modern Water's Monitoring Division, said: "The inclusion of our products in the USABluebook catalogue will continue to strengthen our distribution network and is a considerable step forward for sales of our products in the USA."

Notes to editors

Modern Water owns, installs and operates world-leading membrane technology and develops and supplies advanced systems for water monitoring. Its shares trade on the Alternative Investment Market of the London Stock Exchange.

Modern Water's patented forward osmosis (FO) technology's benefits include lower energy consumption and lessen environmental impact in a variety of industries. With a sales presence in almost 60 countries, the Group's Monitoring Division includes a leading real-time continuous toxicity monitor and trace metal analysers for monitoring the quality of drinking water.
